

Rt Hon George Osborne MP
Chancellor of the Exchequer
HM Treasury
1 Horse Guards Road
London
SW1A 2HQ

4th November 2015

Dear Chancellor

The Conservative Government has made some positive strides to live up to its claim 'to be the party of social enterprises'. The Conservative Manifesto boldly states that it would 'give more people the power and support to...start their own social enterprise'.

Yet, radical and wholly unexpected changes to the Finance Bill will decimate the area that has shown by far the greatest potential for community share issues – community energy.

The proposal to deny community energy investors access to both Enterprise Investment Scheme (EIS) tax relief and Social Investment Tax Relief (SITR) is seen by many in the sector as the final nail in the coffin for future projects; especially given numerous recent assurances on admissibility and coming on top of proposals to significantly reduce Feed-in Tariff rates, remove access to pre-accreditation and remove Climate Change Levy exemptions.

Your previous support for community energy had resulted in real growth and confidence. The sector was at last taking off: with dozens of projects leveraging tens of millions of investment from local communities. Community projects are supported by ordinary people across the UK in a way that is almost unique.

Please reconsider the decision to exclude community energy from this essential support and help communities build a competitive, popular, clean energy system for the future.

Yours sincerely
